**Revitalize White Skin**

Indications: Lighten skin tone, reduce skin spots, repair sun damage and protect against future damage from UV radiation.

Application: Revitalize White Skin protocol is recommended through laser, therapy with microneedle and/or virtual mesotherapy for electroporation.

Contra-indications: Do not use on Rosacea.

1st and 2nd Month: 8 applications (once a week).

If the final results achieved before the 8 applications, the protocol can be suspended. The process can speed up with special techniques (E.g.: Revitalize Booster).

Contents:
- Kojic Acid
- Retinol
- Ascorbic Acid (Vitamin C)

Packaging: 5 vials, 5 ml each.

Expiration: 3 years.

---

**REVITALIZE PROTOCOL**

1. Cleanse the skin thoroughly and apply anaesthetic topical cream to the treatment area.

2. After 15-20 minutes check if the area is numb. Remove topical cream with gauze and warm water. Double cleanse using a suitable skin cleansing solution such as a micellar cleanser & blot dry. Mask the treatment area using clean gauze.

3. Draw up 1ml of Revitalize White Skin per 10x10 cm area using a sterile syringe and needle and than remove the needle (two serums may be mixed together forming a cocktail).

4. Deposit droplets of the serum onto the treatment area & spread evenly using a cotton bud or a sterile gloved finger. 0.5ml at the first application.

5. Choose depth on Revitalize Pen to maximum depth (0.25-1.5mm on the face or 2-2.5mm on the body) using the maximum speed. Begin to stamp the serum into the skin covering all areas using vertical & horizontal lines.

6. Reduce the depth and the speed of the Revitalize Pen to 50% previously chosen. Deposit the remaining 0.5ml serum onto the skin. Use the Revitalize Pen in a circular motion across the treatment area.

7. Gently massage any remaining serum into the skin. Allow to dry naturally. Use a high SPF factor cream following treatment to protect from UV light.

---

**Post treatment advice:** Keep the treated area dry for 24 hours & always wear a high SPF cream.
