FUTURE TECHNOLOGY IN THE FORM OF SIMPLICITY

My Med Aesthetics has years of experience in injectable dermal filler technology and sterile topical cosmetics for professional use. Our products are currently used and loved in nearly 50 countries.

With our scientific background and our commitment to offer top-quality products, we increased our product range to better serve your needs. My Med Aesthetics has extended this expertise to create Oh!, a special line of professional creams for daily use.

MEDICALLY PROVEN | VALUABLE ACTIVE INGREDIENTS | THE AFTERCARE OF CHOICE FOLLOWING AESTHETIC TREATMENTS

In today's fast-paced world we need simple, quick and effective solutions.

My Med Aesthetics had this in mind when created the OH! product line. Three products that contain everything the skin may need, especially following aesthetic procedures such as micro-needling therapy and cosmetic injectables.

Our goal in mind was to omit all unnecessary ingredients particularly those that are harmful to the skin. We put key ingredients into the range that supports optimal cell turnover, strengthen the skin barrier, and are proven antioxidants giving an anti-aging effect.

What do they NOT contain?

- irritating and synthetic perfume
- parabens and petrochemical substances
- harsh preservatives

What do they consist of?

- natural-origin components (100% organic)
- scientifically proven active ingredients
- produced by experts who truly understand the skin's needs

Arising from these main properties, Oh! creams are perfect to recommend after a Revitalize mesotherapy treatment. The key active ingredients of the products prolong desired results, ensuring that the effect on our clients works long term.

GLOWING SKIN BEGINS FROM THE INSIDE!
